

DaVita Inc. Reports 2nd Quarter 2004 Results

PRNewswire-FirstCall
EL SEGUNDO, Calif.

DaVita Inc. , today announced results for the quarter ended June 30, 2004. Net income for the three months and six months ended June 30, 2004 was \$52.4 million and \$105.3 million, or \$0.50 and \$1.02 per share, respectively.

(Logo: <http://www.newscom.com/cgi-bin/prnh/20020729/DAVITALOGO>)

Financial and operating highlights include:

- Cash Flow: For the rolling 12 months ended June 30, 2004 operating cash flow was \$351 million and free cash flow was \$305 million. Excluding the tax benefit from stock option exercises and the after-tax benefit of prior period Medicare lab recoveries, rolling 12-month operating cash flow was \$300 million and free cash flow was \$254 million.
- Operating Income: Operating income for the three and six months was \$96.5 million and \$193.3 million, respectively.
- Volume: Total treatments for the second quarter were 1,704,882 or 21,857 treatments per day, an increase of 7.9% per day compared to the second quarter of last year. Non-acquired treatment growth was 4.5%.
- Center Activity: As of June 30, 2004, we operated or provided administrative services at 592 outpatient centers serving approximately 50,000 patients. During the second quarter we acquired 7 centers, opened 13 de novo centers and provided administrative services to one additional center.

Recent Transactions

On July 22, 2004, we announced that we had entered into a definitive agreement to acquire Physicians Dialysis, Inc. ("PDI"), for approximately \$150 million in cash. The transaction is expected to close by the end of the third quarter. As previously disclosed, we anticipate this acquisition to be EPS neutral in 2005. Operating synergies and growth opportunities over the subsequent 24 months as several centers mature are expected to deliver incremental earnings over the longer-term.

On July 30, 2004, we amended our existing credit facilities in order to modify certain covenants and borrowed an additional \$250 million under a new Term Loan C to fund the PDI transaction as well as other potential acquisitions or share repurchases. We are also in the process of extending the maturity of the Term Loan B until June 30, 2010. We intend to enter into interest rate swap transactions that will effectively fix the interest rate on approximately 40% of our long-term debt.

In May 2004, our Board of Directors approved a three-for-two stock split payable on June 15, 2004, to stockholders of record on June 1, 2004. All share and per share data have been restated to reflect the effects of the stock split.

Outlook

We are increasing our 2004 operating income target to \$385 to \$400 million. Regarding 2005, Centers for Medicare and Medicaid Services (CMS) recently released proposed policy changes with respect to EPO utilization and the 2003 Medicare Modernization Act (MMA) implementation that have the potential to have a material negative impact on our operating income going forward. Our current assessment, which captures a majority of the likely outcomes, is that operating income could be reduced by \$15 to \$30 million annually. Taking this uncertainty into account, we currently expect 2005 operating income to be flat to 6% higher than the 2004 level.

DaVita will be holding a conference call to discuss its second quarter 2004 results on August 3, 2004, at 12:00 PM Eastern Time. The dial in number is 800 399-4406. A replay of the conference call will be available on DaVita's official web page, www.davita.com, for the following 30 days.

This press release includes non-GAAP financial measures, which we believe provide useful information to investors by excluding prior period recoveries and by allowing consistency and comparability in our financial reporting to prior periods for which these non-GAAP measures were previously reported. These measures should be considered in addition to results prepared in accordance with GAAP, but are not a substitute for or superior to GAAP results. Included in this press release is a reconciliation of these non-GAAP measures to the most comparable GAAP financial measures.

This release also contains forward-looking statements. Factors which could impact future results include the uncertainties

associated with governmental regulation, general economic and other market conditions, and the risk factors set forth in the Company's SEC filings, including its Form 10-Q for the quarter ended March 31, 2004. The forward-looking statements should be considered in light of these risks and uncertainties. These risks include those relating to:

- the concentration of profits generated from PPO and private indemnity patients and from the administration of pharmaceuticals,
- possible reductions in private and government reimbursement rates,
- changes in pharmaceutical practice patterns or reimbursement policies,
- the Company's ability to maintain contracts with physician medical directors, and
- legal compliance risks, such as the ongoing review by the U.S. Attorney's Office and HHS Office of the Inspector General in Philadelphia.

The Company undertakes no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

excluding Medicare				
lab recoveries	\$90,636	\$114,526	\$205,162	\$78,778
Less: Tax benefit				
from stock option				
exercises	(10,659)	(14,389)	(25,048)	(4,321)
				(39,529)
	\$79,977	\$100,137	\$180,114	\$74,457
				\$299,854

2. Free cash flow, excluding Medicare lab recoveries related to prior period services and tax benefit from stock option exercises:

Free cash flow represents net cash provided by operating activities

less non-development capital expenditures. We believe free cash flow is a useful adjunct to cash flow from operating activities and other measurements under generally accepted accounting principles in the United States since it is a meaningful measure of our ability to fund acquisition and development activities and meet our debt service requirements. Free cash flow is not a measure of financial performance under generally accepted accounting principles in the United States and should not be considered as an alternative to cash flows from operating, investing or financing activities as an indicator of cash flows or as a measure of liquidity.
