

DaVita Appoints President for Kidney Care Business in Asia Pacific

SINGAPORE, May 10, 2016 /PRNewswire/ -- [DaVita Kidney Care](#), a division of DaVita HealthCare Partners Inc. (NYSE: DVA) and a global provider of kidney care services, today announced that Rehan Khan will serve as president of the company's kidney care business in Asia Pacific.

"We have found a strong leader in Rehan, to grow our network of dialysis centers across Asia Pacific," said Atul Mathur, executive vice president of global operations at DaVita HealthCare Partners. "He brings to the team over 20 years of diverse experience in the healthcare industry across the U.S., Europe and Asia."

Khan previously worked as the managing director of Abbott India Limited, overseeing a team of 3,000. Under his leadership, Abbott India Limited recorded strong performance, with market-beating growth. Khan's also has held positions with AstraZeneca, Accenture and Venture Media.

"Atul and I look forward to having Rehan as a key member of our operating team," said Dennis Kogod, chief executive officer of DaVita International. "This is a very exciting time in Asia Pacific, especially given the recent announcement of our new joint venture with Khazanah and Mitsui."

Last week, DaVita announced a brand new joint venture with [Khazanah Nasional Berhad](#), the strategic investment fund of the Government of Malaysia, and [Mitsui & Co., LTD.](#), one of the most diversified and comprehensive trading, investment and service companies in the world, giving the company great financial resources and market knowledge to quickly expand its operations in Asia Pacific.

Two-thirds of the world's population lives in Asia Pacific, and access to care is a challenge. Currently, DaVita delivers its life-sustaining kidney care services to patients in 64 centers across the region, in both urban and remote, rural areas.

"I am truly looking forward to working with my new DaVita teammates to drive growth in the Asia-Pacific region," said Khan. "There is a powerful opportunity to provide access to high-quality kidney care to patients who are in dire need."

It is estimated that 10 percent of the world's population has chronic kidney disease (CKD), and many do not know it because the symptoms go unnoticed until the disease has progressed to full renal failure.
