Without limiting the foregoing, statements including the words "expect," "intend," "will," "plan," "anticipate," "believe," "forecast," "guidance," "outlook," "goals," and similar expressions are intended to identify forward-looking statements.

These forward-looking statements include but are not limited to statements related to our expectations regarding our proposed purchase of shares in the tender offer, the source of financing for those purchases, the amount of shares to be purchased (including the amount of shares tendered through notice of guaranteed delivery) and the purchase price per share.

Our actual results and other events could differ materially from any forward-looking statements due to numerous factors that involve substantial known and unknown risks and uncertainties. These risks and uncertainties include, among other things:

- the price per share at which we ultimately purchase shares in the tender offer and the number of shares purchased, each of which may differ from the preliminary results indicated in this release, including to the extent that shares tendered through notice of guaranteed delivery are not delivered within the required three business day period;
- the delivery within the required three business day period of shares tendered through notice of guaranteed delivery;
- our ability to complete the tender offer, including the number of shares we are able to purchase pursuant to the tender offer;
- our ability to achieve the benefits contemplated by the tender offer;
- any adverse impact that the tender offer may have on us and the trading market for our common stock;
- the concentration of profits generated by higher-paying commercial payor plans for which there is continued downward pressure on average realized payment rates, and a reduction in the number of patients under such plans, including as a result of restrictions or prohibitions on the use and/or availability of charitable premium assistance, which may result in the loss of revenues or patients, or our making incorrect assumptions about how our patients will respond to any change in financial assistance from charitable organizations;
- the extent to which the ongoing implementation of healthcare reform, or changes in or new legislation, regulations or guidance, enforcement thereof or related litigation, and the extent to which such developments result in a reduction in coverage or reimbursement rates for our services, a reduction in the number of patients enrolled in higher-paying commercial plans, or other material impacts to our business;
- a reduction in government payment rates under the Medicare End Stage Renal Disease program or other government-based programs and the impact of the Medicare Advantage benchmark structure;
- risks arising from potential and proposed federal and/or state legislation, regulation, ballot, executive action or other initiatives, including such initiatives related to healthcare and/or labor matters;
- the impact of the changing political environment and related developments on the current healthcare marketplace and on our business, including with respect to the future of the Affordable Care Act, the exchanges and many other core aspects of the current health care marketplace;
- changes in pharmaceutical practice patterns, reimbursement and payment policies and processes, or pharmaceutical pricing, including with respect to calcimimetics;
- legal and compliance risks, such as our continued compliance with complex government regulations and the provisions of our current corporate integrity agreement;
- continued increased competition from dialysis providers and others, and other potential marketplace changes;
- our ability to maintain contracts with physician medical directors, changing affiliation models for physicians, and the emergence of new models of care introduced by the government or private sector that may erode our patient base and reimbursement rates, such as accountable care organizations, independent practice associations and integrated delivery systems;
- our ability to complete acquisitions, mergers or dispositions that we might announce or be considering, on terms favorable to us or at all, or to integrate and successfully operate any business we may acquire or have acquired, or to successfully expand our operations and services in markets outside the United States, or to businesses outside of dialysis; and our ability to complete the redemption of our 5.750% Senior Notes due 2022 on the terms currently contemplated or at all;
- noncompliance by us or our business associates with any privacy or security laws or any security breach by us or a third party involving the misappropriation, loss or other unauthorized use or disclosure of confidential information;
- the variability of our cash flows; the risk that we may not be able to generate sufficient cash in the future to service our indebtedness or to fund our other liquidity needs; and the risk that we may not be able to refinance our indebtedness as it becomes due, on terms favorable to us or at all;
- factors that may impact our ability to repurchase stock under our stock repurchase program (including the tender offer

described above) and the timing of any such stock repurchases;

- *risks arising from the use of accounting estimates, judgments and interpretations in our financial statements;*
- *impairment of our goodwill, investments or other assets;*
- *uncertainties related to our use of the proceeds from the DMG sale transaction and other available funds, including external financing and cash flow from operations, which may be or have been used in ways that we cannot assure will improve our results of operations or enhance the value of our common stock; and*
- *uncertainties associated with the other risk factors set forth in our most recent quarterly report on Form 10-Q, and the other risks and uncertainties discussed in any subsequent reports that we file or furnish to the SEC from time to time.*

The forward-looking statements should be considered in light of these risks and uncertainties.
